

## Ready for Canada now

## Ready for Canada's future

CANDU® technology is ready today for the global marketplace, as well as for a new build right here in Canada.

We are the proud owners of a unique nuclear technology, and the Canadian men and women who design and build it are proud of the role they play in keeping us all at the forefront of global innovation.

*Keeping AECL at the forefront of global innovation are our 2008 Awards of Excellence winners (pictured above), recognized for their outstanding contributions to Canada's nuclear industry.*
